Simon Willnauer - Elasticsearch

No Slides - No Bullshit!!
<http://www.github.com/simonw/hammertime>

Discovery mode
for new nodes

Run the setup...
./bin/setup.sh

Version ~~ing~~
Resolution

Let's fire up a node and see what happens
This really only starts an ES node by running ./elasticsearch/bin/elasticsearch
plus some sugar... go check it out...
Note: this starts nodes with a clustername set to the output of 'whoami' to prevent
fetching your neighbors data!
./bin/fireupNode.sh mc-hammer

Matches are
partial

Data Out

URL/Index/Type/DocID

URL/Index/search?q=....

StreamZes ← pump data to ES

types cannot be set once indexed

cut-off freq in queries ← Cool!

Kibana → Browser Tool
