

A tool with a tool is still a tool!
Analytic tool block

Has release planning

Also built tool integrations
Git, Selenium, SVN integrations

Application Lifecycle Mgmt

Portfolio Items

Themes, Epics, Features, Kanban

Eclipse + VS plugins

Rally

various types of boards

Plugin on Github!
Interface via REST API

Product backlog
support stories

CFDs
Fore casting
Team capacity
planning

VS integration

obvious

work items

bugs

Not as
flexible
as Rally

Docs

ALM

various
templates

Unit Tests

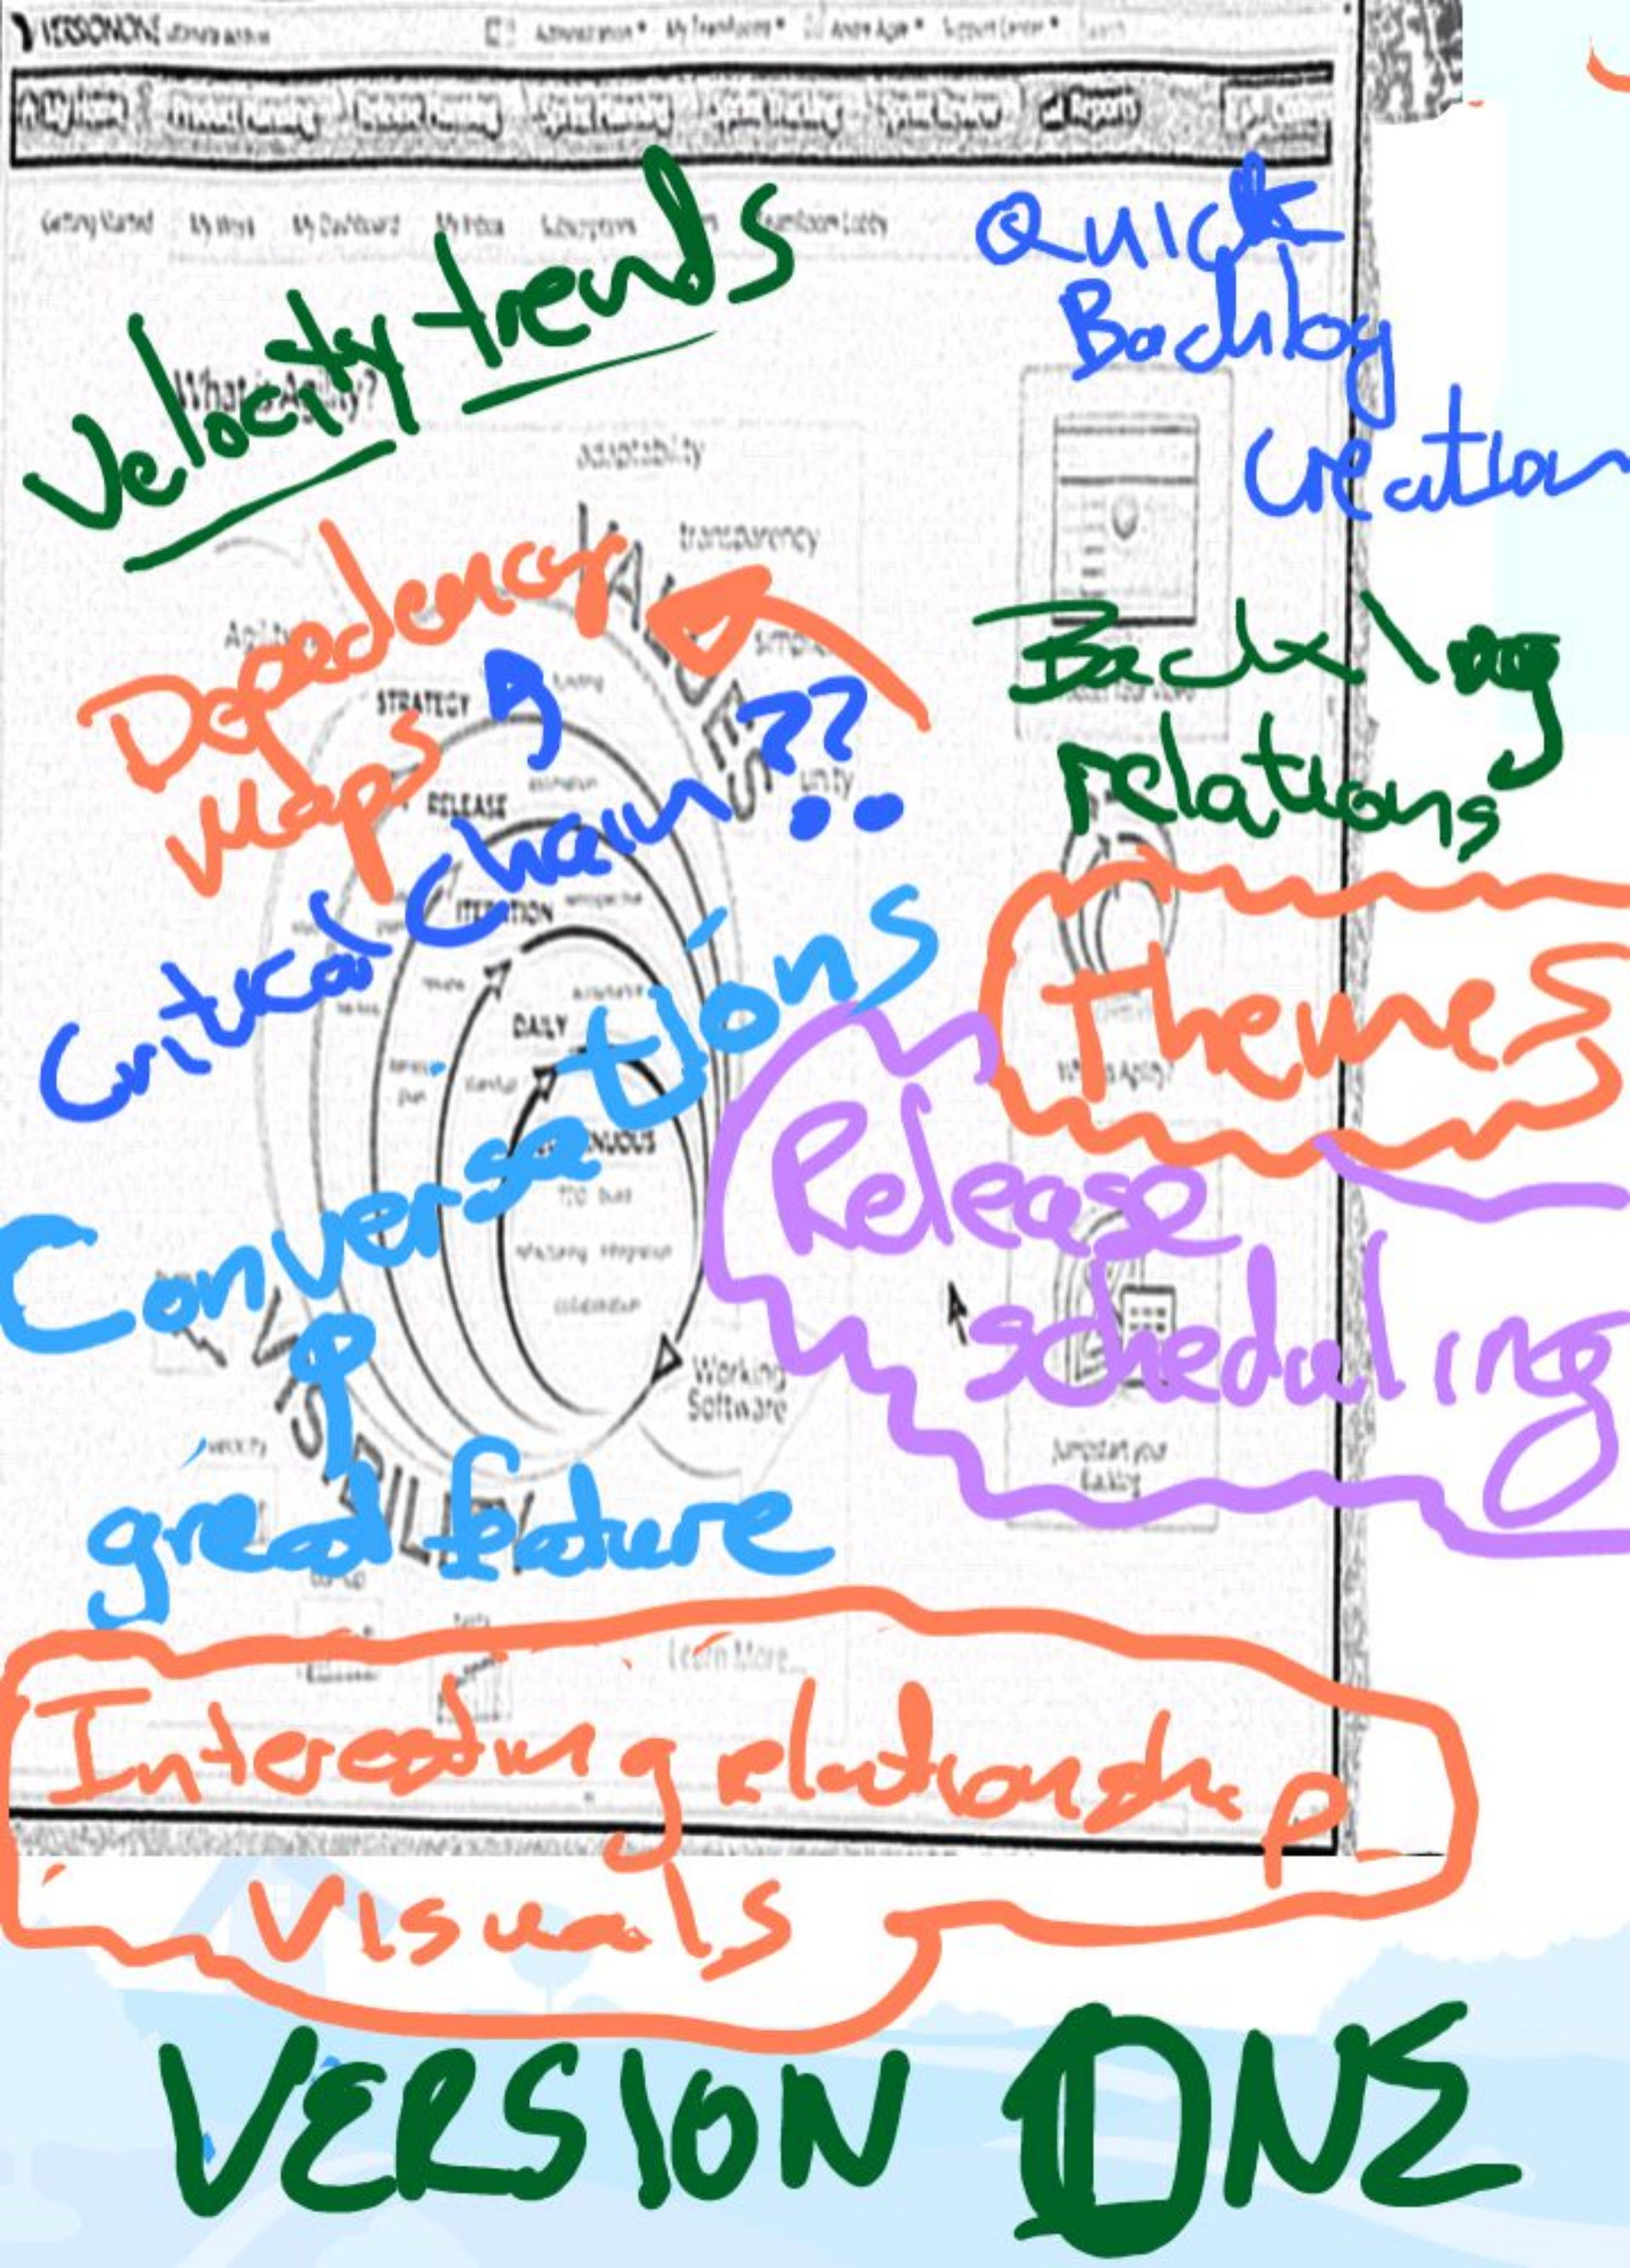

User Stories

My Note

Thought
set

networks
radar
TFs status
to hold

TFS

Basic
start board

Greenhopper
SDS on top
of

Easy to
layout
board

Jira

Ability to
create
sprint

Supports basic "agile" visuals

Stories mapped as
Issues

Customisable
workflows +
fields

Needs a tech to cfg.
