

Need a Ratpack properties file

"prefix" → path prefix in
URL paths

groovyTemplate

Easy way
for simple
templates

by Method
closures by
get, post
etc. ☿

Can also
redirect
TEST

Luke
Daley
Ratpack

"assets"
serve static
content

Register
Jackson
for JSON
Ratpack
has extra
modules for DB

Local Script Application Under
Test
☿
For
Testing

background
via

sync

RATPACK
IS A SYNC

```
import ...

public class Main {

    public static void main(String[] args) throws Exception {
        LaunchConfig launchConfig = LaunchConfigBuilder
            .baseDir(new File(System.getProperty("user.dir")))
            .port(5050)
            .build(new HandlerFactory() {
                public Handler create(LaunchConfig launchConfig) {
                    return new Handler() {
                        public void handle(Context context) throws Exception {
                            context.render("Hello World");
                        }
                    };
                }
            });
    }
}
```
