Andrew Phillips — Preparing for Enterprise Continuous Delivery

Acceleration of time to market

Complete Delivery Artifact
Application binaries
Config files
DB changes etc.

Pipeline stage checklist
Define: owner, input, output, triggers etc.

sequencing
parallel paths

manageable units of work

Scalable capacity
workers
environments

Automation, automation, automation
Deployment Integration testing
auto metrics, Auto feedback cycles

Side effect overview
Track Virtual environments

Release Control
RM reqs must be met.
Can it be automated?

Improvement Metrics
